WWF-TSXV

Winfield Resources Limited (the "Company", WWF- TSX Venture Exchange) wishes to announce that it has entered into a nine (9) well completion program with Burjon Energy Group Limited ("Burjon"). The wells are located in the Lloydminster area of Alberta. Winfield will earn a 12.5% net working interest by expending 25% of the wells completion costs.

Under negotiated terms, Winfield will receive a 25% net interest in the production until capital payout, then revert to a 12.5% net working interest on the project.

Offsetting wells have evidenced production rates of 30 to 50 barrels of oil per day. Completion costs per well are estimated at approximately \$110,000. Based on current market analysis and oil price forecasts, capital project payout is anticipated within 8 months. The completion program is scheduled to begin in the first quarter of this year.

Subsequent to project approval, Winfield will raise \$330,000 in a flow through private placement to meet its funding commitments.

Further to production and geological reviews of this project, an infill drilling program on proprietary offsetting acreage may sustain up to 70 infill drilling locations analogous to existing producing wells.

On Behalf of the Board of Directors,
WINFIELD RESOURCES LIMITED

"Michael Foley" President
